Domain: Align, Plan and Organize Management Objective: AP013 – Managed Security		Focus Area: COBIT Core Model
<b>Description</b>		
Define, operate and monitor an information security management system.		
<b>Purpose</b>		
Keep the impact and occurrence of information security incidents within the enterprise's risk appetite levels.		
<b>The management objective supports the achievement of a set of primary enterprise and alignment goals:</b>		
<b>Enterprise Goals</b>		<b>Alignment Goals</b>
<ul style="list-style-type: none"> <li>• EG02 Managed business risk</li> <li>• EG06 Business service continuity and availability</li> </ul>		AG07 Security of information, processing infrastructure and applications, and privacy
<b>Example Metrics for Enterprise Goals</b>		<b>Example Metrics for Alignment Goals</b>
EG02    a. Percent of critical business objectives and services covered by risk assessment b. Ratio of significant incidents that were not identified in risk assessments vs. total incidents c. Frequency of updating risk profile  EG06    a. Number of customer service or business process interruptions causing significant incidents b. Business cost of incidents c. Number of business processing hours lost due to unplanned service interruptions d. Percent of complaints as a function of committed service availability targets		AG07    a. Number of confidentiality incidents causing financial loss, business disruption or public embarrassment b. Number of availability incidents causing financial loss, business disruption or public embarrassment c. Number of integrity incidents causing financial loss, business disruption or public embarrassment

Management Practice	Example Metrics
<p><b>AP013.02 Define and manage an information security and privacy risk treatment plan.</b></p> <p>Maintain an information security plan that describes how information security risk is to be managed and aligned with enterprise strategy and enterprise architecture. Ensure that recommendations for implementing security improvements are based on approved business cases, implemented as an integral part of services and solutions development, and operated as an integral part of business operation.</p>	<p>a. Percentage of successful security risk scenario simulations</p> <p>b. Number of employees who have successfully completed information security awareness training</p>
Activities	Capability Level
1. Formulate and maintain an information security risk treatment plan aligned with strategic objectives and the enterprise architecture. Ensure that the plan identifies the appropriate and optimal management practices and security solutions, with associated resources, responsibilities and priorities for managing identified information security risk.	3
2. Maintain as part of the enterprise architecture an inventory of solution components that are in place to manage security-related risk.	
3. Develop proposals to implement the information security risk treatment plan, supported by suitable business cases that include consideration of funding and allocation of roles and responsibilities.	
4. Provide input to the design and development of management practices and solutions selected from the information security risk treatment plan.	
5. Implement information security and privacy training and awareness programs.	
6. Integrate the planning, design, implementation and monitoring of information security and privacy procedures and other controls capable of enabling prompt prevention, detection of security events, and response to security incidents.	
7. Define how to measure the effectiveness of the selected management practices. Specify how these measurements are to be used to assess effectiveness to produce comparable and reproducible results.	4

APO13.01 Establish and maintain an information security management system (ISMS).	From	Description	Description	To
	Outside COBIT	Enterprise security approach	ISMS scope statement	APO01.05; DSS06.03
			ISMS policy	Internal
APO13.02 Define and manage an information security risk treatment plan.	APO02.04	Gaps and changes required to realize target capability	Information security risk treatment plan	All APO; All BAI; All DSS; All MEA; ALL EDM
	APO03.02	Baseline domain descriptions and architecture definition	Information security business cases	APO05.02
	APO12.05	Project proposals for reducing risk		

E. Component: Principles, Policies and Procedures			
Relevant Policy	Policy Description	Related Guidance	Detailed Reference
Information security and privacy policy	Sets behavioral guidelines to protect corporate information, systems and infrastructure. Given that business requirements regarding security and storage are more dynamic than I&T risk management and privacy, their governance should be handled separately from that of I&T risk and privacy. For operational efficiency, synchronize information security policy with I&T risk and privacy policy.
